

Project Plan

Overview

The project is to create a e-learning website for a question-and-answer purpose. This project plan is based on creating a perfect schedule to divide and achieve the completion of tasks without any delay or risk.

Scope

As mentioned earlier in other documents, here the customers will be able to post a question related to any topic also, the customer can answer the questions asked by other. Also, the group of experts will be there to provide brief information and knowledge. Here, questioning and answering will be the collaborative effort within the member of the website itself.

Objectives

Here, in the initial path the main objective is to run every task to create a website in a scheduled and effective way.

1. Develop the use case diagram
2. List out the non-functional requirements
3. List the possible risk that may come in the path
4. Start working according to the use case diagram
5. Start coding for the website
6. Create a high level of user interface
7. Start a testing of the code
8. If any error found, conduct debugging

Roles and Responsibilities

When establishing a new team, it is important to ensure that every member understands their role and responsibilities at the outset of the project. Use a table like the one below to organize the necessary information about all of the team members.

Team Member	Role	Responsibilities
Sahil Shafiq	Team manager	<ul style="list-style-type: none"> • Will handle all the documents • Keep good flow of communication among the members • Work closely with team
Zaryab Quershi	Assistant manager/Advisor	<ul style="list-style-type: none"> • Will help team manger whenever needed • Provide quick solution for any risk
Pradeep Niure	Developer	<ul style="list-style-type: none"> • Will create a code required for a code
Chhiring Moktan	Designer	<ul style="list-style-type: none"> • Will design the layout of the website • Work with developer in creating a code
All team member	Software tester	<ul style="list-style-type: none"> • Conduct all level of testing as a team
All team member	Software debugger	<ul style="list-style-type: none"> • Make a code runnable and error free

Deliverables

List the specific products or services that you will provide to the client. Provide a brief description of each and note who from the project team will be in charge of providing it. You can arrange this information in a table like the one below.

Deliverable	Description	Person Responsible
Simple and creative user interface	The user interface will be easy for every educated and non- educated person to use however the other features will be creative	Chhiring
Solve problems	Any question related to the using of a product will be solved through online chat	Sahil Shafiq
Answer question	All the questions asked by users will be answered within few minutes	All team members
No errors	Make sure there is no any issues in the user interface	Pradeep Niure

Schedule

Since, the real project should be completed within the end of January 2022, all the team's members will start working on the work soon. However, it is still to be advised for the actual scheduling of a tasks.

Approval and Signatures

Request that the client, project sponsor, and any other key stakeholders review and approve the project plan. Consider including a section for signatures like the one below.
